

GTM Tech Stack Overview

AI-Native Command Center for Revenue Operations
2026

Confidential · LambdaTest GTM Operations

Executive Summary

■ Unified GTM Operations

Single AI-native platform powering all revenue touchpoints and growth motions.

■ AI-First Architecture

Claude-powered agents embedded across prospecting, enablement, and customer success.

■ Real-Time Intelligence

Live insights from pipeline to product usage—no data silos.

■ Automated Workflows

60 % reduction in manual effort through end-to-end automation.

■ 15 + Integrated Tools

Seamless data flow across every mission-critical GTM platform.

Core Revenue Platforms

■ Salesforce — CRM & Revenue Operations Hub

- Single source of truth for all customer data
- Custom automation for deal progression & pipeline hygiene
- AI-powered forecasting and territory management

■ ChartMogul — Revenue Analytics & MRR Tracking

- Subscription metrics, cohort analysis, and LTV modeling
- Churn prediction and real-time retention insights

■■ Gong — Conversation Intelligence

- AI-powered call analysis and rep coaching
- Deal risk detection and win/loss pattern recognition
- Competitive intelligence extracted from every call

GTM Enablement Stack

■ GTMBuddy — Sales Enablement & Content AI

- Just-in-time content recommendations during live calls
- AI-generated battlecards and objection-handling playbooks

■ Clay — Data Enrichment & Prospecting

- Automated lead enrichment from 50 + data sources
- AI-powered ICP scoring and waterfall enrichment

■ JustCall — Cloud Contact Center

- Omnichannel communications (voice, SMS, WhatsApp)
- Call recording, transcription, and sentiment analysis

■ Amplitude — Product Analytics

- User-behavior tracking and funnel analysis
- Product-led growth signals surfaced to sales

AI-Native Command Center Architecture

AI Integration Layer	Data Infrastructure
• Claude API — NLP & agentic workflows • Custom AI agents for task automation • Real-time synthesis across platforms	• Centralised warehouse (Snowflake/BigQuery) • Real-time ETL pipelines • AI-ready semantic data models
Automation Framework	Security & Compliance
• Zapier / Make for no-code workflows • Custom REST/GraphQL integrations • Event-driven triggers and webhooks	• SOC 2 Type II compliant • Role-based access controls (RBAC) • Encryption at rest and in transit

AI Automation Roadmap

Q2 2026 — Foundation

- AI-powered lead scoring and intelligent routing
- Automated email personalisation at scale
- Smart meeting scheduling and follow-up generation

Q3 2026 — Optimisation

- Predictive deal scoring and real-time risk alerts
- AI-generated proposals and contract drafting
- Automated competitive intelligence gathering

Q4 2026 — Advanced Intelligence

- Cross-platform multi-touch revenue attribution
- AI-driven customer health scoring and forecasting
- Autonomous renewal and expansion workflows

Strategic GTM Metrics Dashboard

■ Revenue Metrics	ARR Growth Rate MRR Movement Net Revenue Retention (NRR)
■ Pipeline Health	Pipeline Coverage Ratio Avg. Deal Size Win Rate by Segment
■ Efficiency Metrics	Sales Cycle Length CAC Payback Period SaaS Magic Number
■ Team Performance	Quota Attainment Ramp Time Daily Activity Metrics
■ Customer Success	NPS Score Customer Health Score Expansion Revenue Rate

Complete Technology Stack

Category	Tools
Revenue Operations	Salesforce · ChartMogul · Gong
Sales Enablement	GTMBuddy · Clay · JustCall
Analytics & Intelligence	Amplitude · Custom BI Dashboards
AI & Automation	Claude AI · Zapier/Make · Custom integrations
Data Infrastructure	Snowflake / BigQuery · Real-time ETL
Security & Compliance	SOC 2 Type II · RBAC · Encrypted data layer

Impact & Success Metrics

Area	Metric	Impact
Operational Efficiency	Manual data entry	▼ 60%
Operational Efficiency	Lead response time	▼ 45%
Operational Efficiency	Forecast accuracy	▲ 35%
Revenue Impact	Win rate	▲ 25%
Revenue Impact	Sales cycle length	▼ 40%
Revenue Impact	Average deal size	▲ 20%
Team Productivity	Customer-facing time	▲ 50%
Team Productivity	Rep ramp time	▼ 30%

Building the Future of GTM
